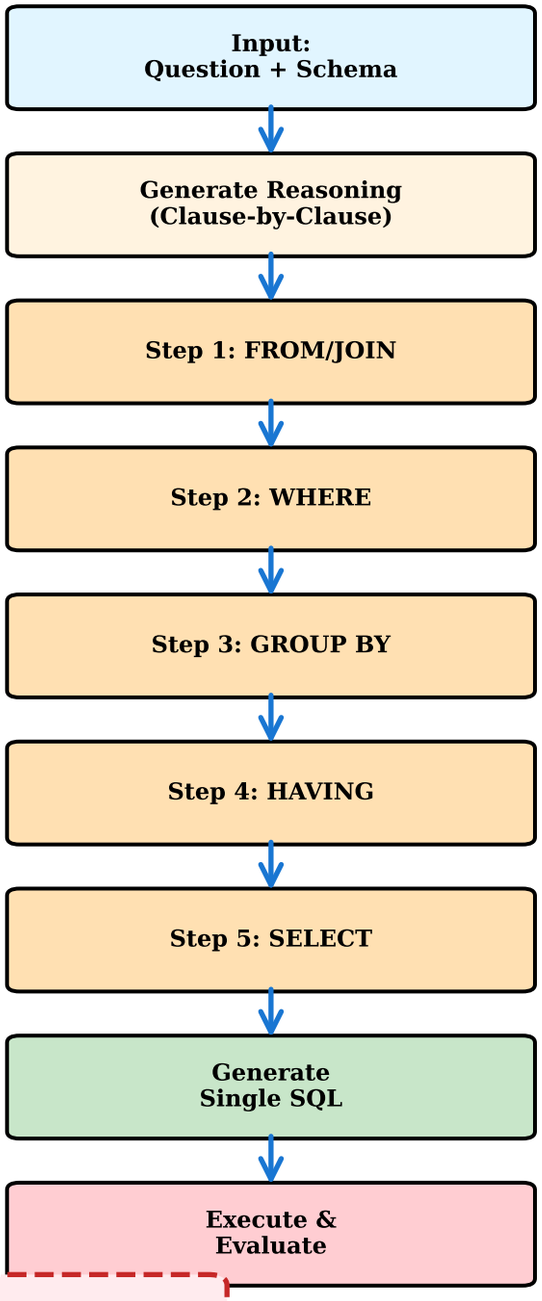
Comparison: Chain-of-Thought vs. Structured Chain-of-Thought

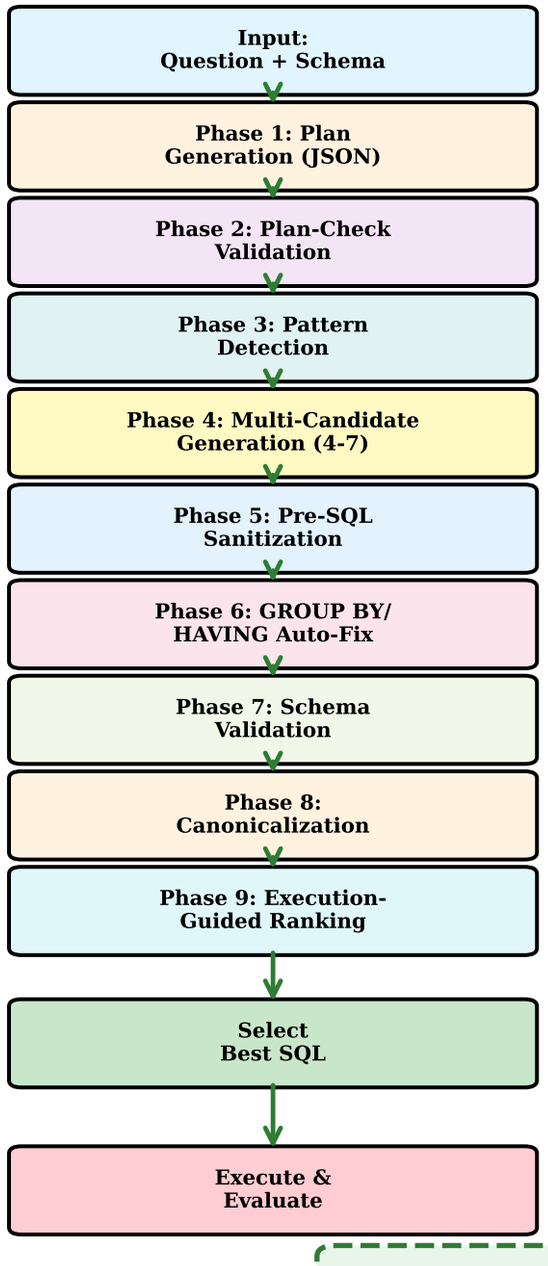
Chain-of-Thought (CoT)
Accuracy: 40.17%



⚠ Limitations:

- Error propagation
- Single reasoning path
- No validation

Structured Chain-of-Thought (SCoT)
Accuracy: 84.33%



✓ Advantages:

- Multiple candidates
- Automated fixes
- Multi-layer validation
- Execution ranking

Key Difference: CoT uses unstructured natural language reasoning (single path), while SCoT enforces structured JSON plans with multi-candidate generation and automated validation.
